Customer Service

EXPERIENCE

Career Break

April 2022 - Dec 2024

Invested my career break in intensive Data Analytics and Software Engineering training, building a robust analytical and technical foundation to drive data-driven solutions across various business initiatives.

- Analysed large-scale government request datasets using SQL and Tableau.
- Delivered data-driven insights to identify service gaps and recommend process improvements.
- Applied basic ETL principles to automate data ingestion and preparation.
- Built basic web applications in a learning environment, applying software development best practices.
- Gained a strong technical understanding, allowing effective collaboration with developers and technical teams.

Customer Service Representative

Various (Hospitality & Aged Care)

Jan 2018 – Sep 2024

Gained hands-on experience in hospitality and aged care while establishing myself in Australia and improving my English. During this time, I worked with diverse teams and optimised processes.

- Managed and analysed client data to improve service quality and optimize scheduling, ensuring personalized care.

- Communicated with diverse stakeholders, translating client needs into actionable insights for management.
- Successfully retained clients and improved client satisfaction through personalized care and proactive issue resolution, reversing a trend of client loss prior to joining.

Business Analyst

Valeo Thermal Bus Systems

Jun 2016 – Sep 2017

- Solved order fulfillment delays by identifying key process bottlenecks and collaborating across teams, resulting in a 20% increase in on-time deliveries.
- Analysed and negotiated orders and delivery schedules, ensuring timely and accurate fulfillment of customer requirements.
- Facilitated stakeholder communication between supply chain, sales, and operations teams to align business goals.

Business Analyst

Keko Automotive

Feb 2012 – May 2016

- Successfully supported the implementation of an ERP software system, improving operational efficiency and data management across the company.
- Conducted regular statistical report generation to support business decision-making.
- Built strong interpersonal relationships with marketing and production teams, facilitating smooth coordination and process optimization.
- Developed and implemented a plan to solve inventory issues, reducing obsolete stock by 30%.
